

Company Profile

The world of work has changed forever.
Have you changed with it?

Introduction

Smart Presentations Limited are not your typical audio visual technology systems integrator.

We care as much about our clients' business as our own. The way we do business is two fold. Firstly we sell outcomes....helping businesses to drive up productivity, be more efficient in their meetings and presentations, and save money. Secondly, we deliver implementation of business-critical tools 'Right First Time'.

Business Productivity

Our team provide organisations with innovative technology and collaborative working processes that expand the potential of what their groups of people working together can achieve. This drives business productivity for our clients, and brings them greater success. **We measure our success by our client's success.**

In providing the latest in digital infrastructure using innovative interactive touch technology and software, we address five areas that businesses tell us they need to make more efficient:

- Meetings
- Video and data conferencing
- Workspaces and flexible working
- Training
- Marketing and communications.

Supporting you

Discover 1st class service and support for your organisation. You can be assured of a comprehensive 'one-stop shop' service from initial consultancy and needs analysis, through to installation, training and on-going technical support / maintenance services.

Clients we work with

Our clients are typically ambitious leaders in their field of expertise. They expect a job done well, and to deal with people that care and go the extra degree of effort. That's why they work with Smart Presentations Limited. We strive to support their goals of business productivity, being more efficient in their meetings and presentations, saving time and money and achieving a return-on-investment, as well as a lower carbon footprint.

Our reputation for delivering what we say we will on the day of completion is the foundation of our long-term success and long term relationships. This positive 'Right First Time' experience has made us our clients' preferred choice.

For years, collaboration was supported by these organisations – or arguably hindered – by a rudimentary set of tools, whether it was flip charts and dry wipe boards or, more recently, the emergence of teleconferencing, video and web-based conferencing, which deliver communication, but fall short of a truly collaborative experience.

The latest collaboration solutions are not only helping our clients drive up productivity and save money, in the midst of the biggest global downturn for a generation, they are proving to be a business-critical tool. Our mission is to be the preferred choice for organisations by virtue of our reputation and the quality of our services.
