

Field Operations

Communicate and consult effectively with field staff

“Our new SMART collaboration capability enables people to meet, regardless of where they are in the world, and interact as if they were in the same room. This has had a massive impact on travel costs and reduced our carbon footprint significantly.”

Bola Oshisanwo, Director,
Agile Development Centre,
BT

Reduce room for error and the need for travel

Expert opinions are often critical, but gathering opinions and advice from multiple locations isn't always possible or cost-effective. SMART solutions let your experts work collaboratively with on-site managers to offer support and take immediate control – when and where you need it.

Global business has made multi-location meetings essential, putting a spotlight on long-distance communication. And when your own team members are located in the field, the challenge is even greater. That's where SMART solutions make a difference.

SMART solutions can help reduce the problems intrinsic to field operations – problems that include limited shared visibility, misunderstandings and poor distribution of the latest information. Whether reviewing plans for a drilling operation or status reporting for a production facility, SMART solutions let you share and modify documents together, reducing the room for error and helping resolve issues before they become serious problems.

SMART products allow staff in every location to see, write over, save and send electronic documents simultaneously – letting you not only communicate but genuinely collaborate from anywhere in the world.

“SMART’s interactive technology is helping to facilitate cultural change within our organisation. It is allowing our workforce to collaborate quickly and easily on projects.”

David Dryden, Managing Partner,
Cundall

“After the introduction of the SMART Board, my expenses dropped tenfold. You can imagine what the figures would look like if all employees used the solution.”

Chris Hanson, Internal Sales Director,
Computacenter

With SMART solutions for field operations, you can:

- **Communicate and consult** – get all the benefits of real-time problem solving by allowing communication between off-site experts and your teams in the field
- **Save time and money** – put your experts on site, with no travel and no time spent sending resources into the field with SMART’s data conferencing software
- **Prevent costly stoppages** – get faster diagnoses and prevent issues from causing expensive delays
- **Get faster sign-off** – enable multi-location teams to physically contribute to documents and plans, and get sign-off on the agreed solution
- **Drive efficiency** – get the benefits of real-time problem solving when your experts collaborate instantly with your field personnel
- **Improve record keeping and documentation** – write, edit, save and distribute all your meeting notes and discussions

Clearer, more accurate communication

Three key things can make a difference to your business success. Your people, their ideas and how they work together. That’s what drives SMART solutions – and it means SMART can help you deliver faster, better results across your business.
