3	SMART Board 685ix interactive whiteboard system
4	SMART USB speakers
5	SMART Meeting Pro™ Premium software

Discover how SMART business solutions can inspire productive collaboration across distances to enable fast and effective diagnosis and decision-making in the field.

SMART Board 685ix interactive whiteboard system

Make your teams more productive with the 685ix, the first integrated system to combine an ultra-short-throw projector, a touch-enabled interactive whiteboard and an extended control panel. The system works with your dedicated meeting room computer, enabling you to access and easily share network information, record ideas and decisions in digital ink, save notes and distribute them after the meeting.

SMART Podium ID422w interactive pen display

Collaborate with colleagues by bringing interactivity to your meeting materials. The SMART Podium connects to your meeting room computer and projector, allowing you to write notes in digital ink and save them in programs such as Microsoft® Word®, Excel® and PowerPoint®, as well as AutoCAD® and Adobe® Acrobat®. You can also access websites and multimedia files and display everything you do on a large screen so everyone can see.

SMART Meeting Pro Premium software

Accomplish more in meetings with collaboration software that enables you to write in digital ink and save everything from marked-up pages to screen captures as a single PDF, PPT or image file. Write and save notes in programs such as Microsoft Word, Excel and PowerPoint, as well as AutoCAD and Adobe Acrobat. You can also access powerful interactive whiteboarding tools, such as shapes and lines, text conversion and content capture.

SMART Bridgit conferencing software

Create collaborative sessions that save time, connect local and remote participants and reduce travel. With this conferencing software, your teams can easily access and interact with information, regardless of their location. Share data, voice and video with anyone who has an Internet connection. Whether a meeting is planned or spontaneous, SMART Bridgit can generate an e-mail invitation for you. And when participants accept, they can join the meeting without installing any special software.

SMART Board 6052i interactive display

Improve meeting efficiency with a touch-enabled LCD interactive display. The 6052i is a large, high-quality display that enables you to easily access your digital files, applications and resources. Open and write in Microsoft Word and PowerPoint, and other commonly used applications, with digital ink. You can also save all your notes in one file, and e-mail them to your colleagues or save them on a USB drive to share later.

SMART USB speakers

Make meetings and presentations more engaging by adding sound to your SMART Board interactive whiteboard or display. The audio system consists of a pair of 14-watt, stereo-amplified speakers with a two-port USB hub and volume control button. DVD players or other peripherals can be connected to the speakers through an auxiliary input. The speakers can be mounted on the wall, and only one cable is needed to connect everything to your meeting room computer.
